

This page shows a representation of all the 421 shades available in Appletons Crewel Wools organised in colour groups. Please note it is impossible exactly to match colours on your computer screen to those of the wools themselves. This is due to the many differences in computer monitors and graphic cards, and the way in which particular colours are displayed. Whilst this page will give you a general impression of the relationships between the various colours and shades we must emphasise that only the Appletons Wools Shade Swatch can be relied upon for accurate colour matching.
